

# General Specifications

## Model SX42 2-electrode Conductivity Sensors for High Temperature

GS 12D07J03-01EN-P

### ■ Overview

These high temperature conductivity sensors have a stainless-steel body and a ceramic insulation, especially designed to withstand high temperatures (up to 250°C) and pressures (up to 40 bar). A special treatment of the electrodes ensures optimal resistance against polarization.

The flanged model has an integral connection box, the threaded models are provided with an Amphenol connector to fit the Yokogawa WU40 cable or Variopin connector to fit with Yokogawa WU10/WE10-cable.

All sensors have a pre-calibrated cell constant and a built-in temperature element for automatic temperature compensation. Sensors with the Variopin connector are equipped with an ID-chip in which calibration information is stored for easy setup when connected to a SENCOM Smart Adapter model SA11-C1. For metal sensors a 3.1 material certificate is included. The sensors are certified for hazardous area when connected to a certified intrinsically safe Yokogawa analyzer, model SC202S or FLXA-series or a certified intrinsically safe circuit with defined output parameters

The combination of the sensor plug and cable is watertight and can handle temperatures up to 100°C. The aluminium connection box of the flanged types has been selected to have easy connection with high temperature cabling.

### ■ Features

- High temperature and pressure ratings
- Built-in temperature resistor: Pt1000
- Fast temperature response
- Plug and cable form a watertight connection to IP67
- Flange model type with integral connection box
- Threaded models equipped with standardized connections 1" NPT or R1
- Compatible with new SENCOM smart adapter SA11 (VarioPin version)
- Certified for hazardous area
- Optimal resistance against polarization

## ■ 1. General Specifications

### 1.1 Measuring method

Principle of measurement : Contact conductivity 2-electrode system

### 1.2 Measuring element

Electrodes : Stainless steel inner and outer electrodes

Temperature sensor : Pt1000

### 1.3 Materials

#### Wetted parts

Sensor Body : Stainless Steel AISI 316L

Electrodes : Stainless Steel, AISI 316L

Insulation : Ceramic (aluminium oxide)

Sealing : GYLON® Style 3500 PTFE with Silica

#### Non-wetted parts

Connector Amphenol

Contacts : gold plated

Insulation : Polyamide

Connector Variopin

Contacts : gold plated

Material : Nickel-plated brass

Insulation : PEEK, UL94-V0

Terminal box flanged models

Housing : Aluminum

Connector : Ceramic

### 1.4 Functional specifications (at 25 °C)

Temperature element : Pt1000 to IEC 751

Nominal Cell Constant (C.C.) : SX42-SX24 : 0.1 cm<sup>-1</sup>

SX42-SX34 : 0.01 cm<sup>-1</sup>

Note: The temperature sensor included in the sensor is designed for process compensation and for indication. It is NOT designed for process temperature control.

### 1.5 Dynamic specifications

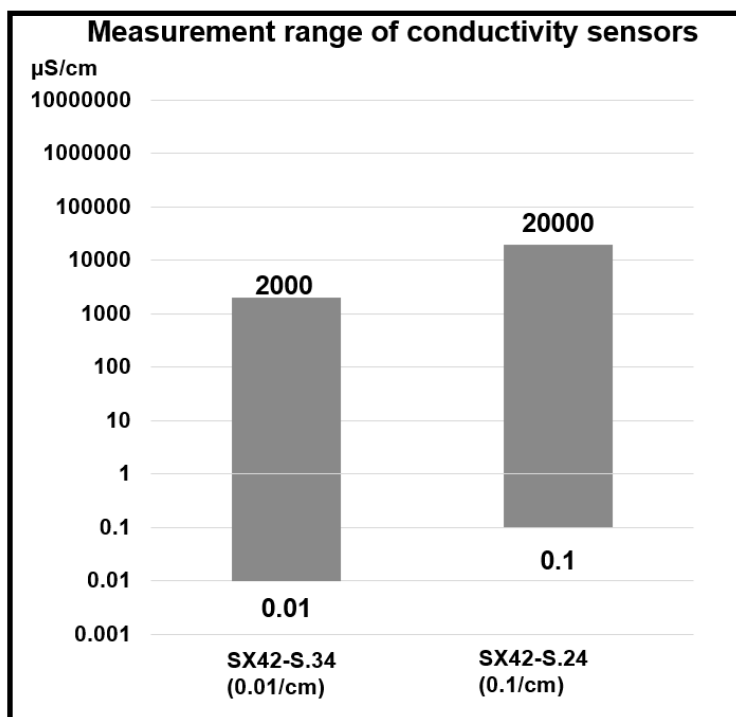

Response time temp. (t<sub>90</sub>) : SX42-S.24-.. : t<sub>90</sub> < 3 min.

SX42-S.34-.. : t<sub>90</sub> < 3 min.

### 1.6 Operating range

Conductivity range\* at actual process temperature : 1 μS x C.C. – 200 mS x C.C. - See Figure 1

\* measurement range dependent on input range analyzer.

**Figure 1:** Measuring range of conductivity sensors section

Temperature @ 1 Bar (14.5 PSIG) :

Threaded models (-BS, NS)

: 0 °C to 200 °C (32 °F to 392 °F)

Threaded models (-BV, NV)

: 0 °C to 125 °C (32 °F to 257 °F)

Flanged models

: 0 °C to 250 °C (32 °F to 482 °F)

Pressure @ 25 °C for all models

Over pressure\*

: 0 to 40 barg (0 to 580 PSIG)

Under pressure\*

: 0 to 0.5 barg (0 to 7 PSIG)

Pressure @ Tmax. °C for models

-BS, -NS, -BV, -NV, -AF, -DF : Over pressure Under pressure

0 to 40 barg 0 to 0.5 barg

(0 to 580 PSIG) (0 to 7 PSIG)

-EF : 0 to 30 barg 0 to 0.5 barg

(0 to 435 PSIG) (0 to 7 PSIG)

\* Unit definition: barg = bar gauge, over pressure against atmosphere.

barg = under pressure against atmosphere

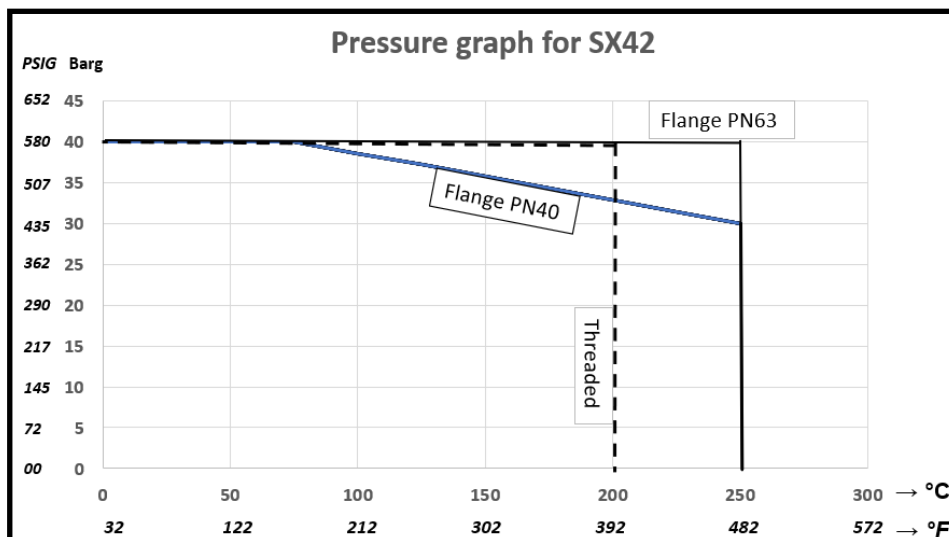

Figure 2: Pressure vs Temperature

Cable length:

Threaded models (-BS,-NS)

: max. 60 meter with WU40 cable in combination with WF10 cable and BA10 junction box

Threaded models (-BV,-NV)

- Variopin connector connected to FLXA analyzer.

: max. 60 meter with WU10-V-D/WE10 (possibly in combination with WF10 cable and BA10 junction box)

- Variopin connector connected to

: 3 meter WE10 cable (as option) combined with SA11 Smart Adapter SA11 Smart Adapter Smart Adapter directly connected to the analyzer using a WU11 cable up to 100 meters or Connected to a BA11 connection box using WU11 cable up to 100 m. The BA11 connection box is connected to the analyzer using a WU11 cable up to 100m

Flanged models

: max. 60 meter with customer specified high temperature cable

### 1.7 Shipping details

Package size (LxWxH)

: Threaded models 300 x 100 x 75 mm (11.8 x 3.9 x 3.0 inch)  
Flanged models 480 x 275 x 235mm (18.9 x 10.8 x 9.3 inch)

Package weight (max.)

: Threaded models 0.5 to 0.7 kg (1.1 to 1.5 lbs)  
Flanged models 5.7 to 6.0 kg (12.6 to 13.2 lbs)

### 1.8 Environmental conditions

Storage temperature

: -30 °C to +50 °C (-22 °F to +122 °F)

Ingress Protection Type Amphenol connector

: IP65 (conform IEC 60529)

Ingress Protection Type Variopin connector

: IP67 (conform IEC 60529)

## ■ Addendum 2: Control drawings

FM-United States Applying standards	: FM Class 3600 FM Class 3610 FM Class 3810 ANSI/ISA 60079-0 ANSI/ISA 60079-11
Certificate no.*	: FM20US0123X IS CL I, DIV 1, GP ABCD, T2...T6 CL I, ZN 0, AEx ia IIC, T2...T6 Ga Control Drawing: D&E 2020-024-A50
Electrical data	: See Note 1
Specific conditions of use	: See Control Drawing D&E 2020-024-A50.  Temperature classes for SX42 models are defined T2...T6, see Note 1.

**Note 1** : Intrinsically safe, entity, for Class I, Division 1, Groups A, B, C and D;  
Class I, Zone 0, AEx ia IIC, Ga (entity) for hazardous (classified) locations  
when installed per control drawing D&E 2020-024-A50.  
Maximum sensor input parameters:  
Ui= 14.4 V; Ii= 116.5 mA; Pi= 0.3424 W; Li= 0 mH  
Ci= 0 nF (BS, NS and \*F type) or Ci=0.4 nF (BV and NV type).

Ambient temperature:

- 30°C to +40°C for temperature class T6,
- 30°C to +95°C for temperature class T5,
- 30°C to +125°C for temperature class T4 (BV and NV type),
- 30°C to +130°C for temperature class T4 (BS, NS and \*F types),
- 30°C to +125°C for temperature class T3 (BV and NV type),
- 30°C to +165°C for temperature class T3 (BS, NS and \*F types),
- 30°C to +125°C for temperature class T2 (BV and NV type),
- 30°C to +275°C for temperature class T2 (BS, NS and \*F types).

When the sensor has been connected to non intrinsically safe equipment  
which exceeds the restrictions regarding the sensor input circuits, the sensor  
is not suitable anymore for intrinsically safe use.

\* Certification is subject to change, due to new regulations or changes in the product itself.

When a certificate is updated, a new revision under the same certificate number is created with a new date.

- FM-United States:

FM20US0123X (effective from 03-2021)

## Remarks:

1. No revision to this drawing without prior approval of FM.
2. Installation must be in accordance with the National Electrical Code (ANSI/NFPA 70), ANSI/ISA-RP12.06.01, and relevant local codes.
3. The sensor shall be installed to a certified intrinsically safe HOST with the following maximum values:  $U_o = 14.4\text{ V}$ ,  $I_o = 116.5\text{ mA}$ ,  $P_o = 342.4\text{ mW}$ .
4. The sensor does not provide isolation from earth. Installers shall take necessary measures to prevent the possibility of sparking resulting from differing earth potentials between the sensors and interconnecting equipment. This can be realized for example by selecting interconnecting equipment which provides input-to-output and input-to-earth isolation up to 500 V rms.
5. Sensor Model code:

Model	Suffix Codes	Option Codes
SX42	-abcd-efgh	/i

abcd Cell Constant: Four alphanumeric character (A to Z, 0 to 9 or a hyphen)

ef Connection type:

- BS ISO7/1-R1 screw thread + connector without ID-chip
- BV ISO 7/1-R1 screw thread + connector with ID-chip
- NS NPT screw thread + connector without ID-chip
- NV NPT screw thread + connector with ID-chip
- AF 2-inch 600 LBS ANSI flange + terminal block
- DF DN50-PN63 EN flange + terminal block
- EF DN50-PN40 EN flange + terminal block

g Spare code: Any one character

h Style code: A

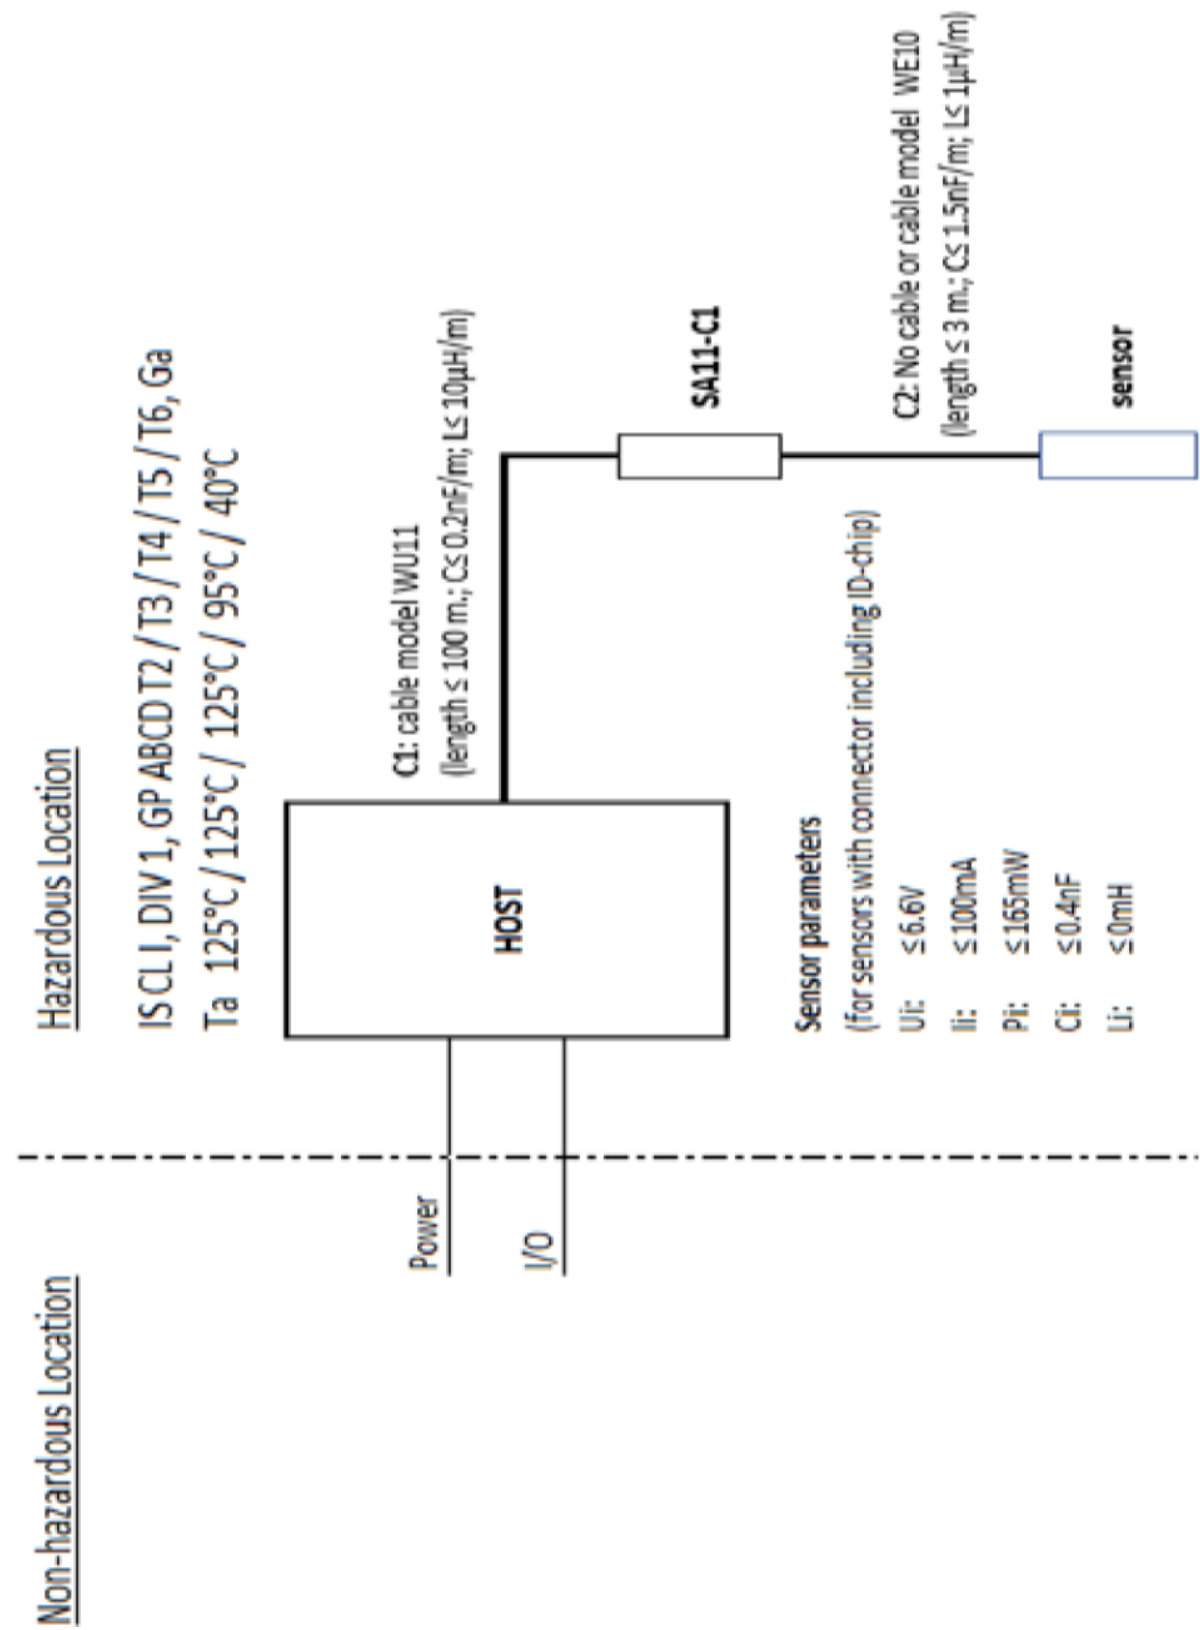

i Option code: Up to ten alphanumeric characters  
(A to Z, 0 to 9 or hyphen)

#### 6. WARNING - POTENTIAL ELECTROSTATIC CHARGING HAZARD – SEE INSTRUCTIONS

pH sensors containing accessible plastic parts and/or external conductive parts, must be installed and used in such a way, that dangers of ignition due to hazardous electrostatic charges cannot occur, especially in the case that the process medium is non-conductive.

#### WARNING - POTENTIAL IGNITION HAZARD – SEE INSTRUCTIONS

Contact Conductivity sensors containing light metals, must be installed and used in such a way that, even in the event of rare incidents, ignition sources due to impact and friction sparks are excluded.

**Remarks:**

1. No revision to this drawing without prior approval of FM.
2. Installation must be in accordance with the National Electrical Code (ANSI/NFPA 70), ANSI/ISA-RP12.06.01, and relevant local codes.
3. The sensor shall be installed to a certified intrinsically safe Smart Adapter, model SA11-C1, with the following maximum values:  $U_o = 6.6 \text{ V}$ ,  $I_o = 100 \text{ mA}$ ,  $P_o = 165 \text{ mW}$ .
4. The Installers shall take necessary measures to prevent the possibility of sparking resulting from differing earth potentials between the sensors and interconnecting equipment. The sensor itself does not provide 500 V rms isolation from earth, the interconnecting equipment Model SA11-C1 Smart Adapter however provides this required isolation.
5. Sensor Model code:

Model	Suffix Codes	Option Codes
SX42	-abcd-efgh	/i

abcd	Cell Constant:	Four alphanumeric character (A to Z, 0 to 9 or a hyphen)
ef	Connection type:	BV ISO 7/1-R1 screw thread + connector with ID-chip NV NPT screw thread + connector with ID-chip
g	Spare code:	Any one character
h	Style code:	A
i	Option code:	Up to ten alphanumeric characters (A to Z, 0 to 9 or hyphen)

**6. WARNING - POTENTIAL ELECTROSTATIC CHARGING HAZARD - SEE INSTRUCTIONS**

pH sensors containing accessible plastic parts and/or external conductive parts, must be installed and used in such a way, that dangers of ignition due to hazardous electrostatic charges cannot occur, especially in the case that the process medium is non-conductive.

**WARNING - POTENTIAL IGNITION HAZARD - SEE INSTRUCTIONS**

Contact Conductivity sensors containing light metals, must be installed and used in such a way that, even in the event of rare incidents, ignition sources due to impact and friction sparks are excluded
