

# LOW-ΔP-FLOW

Mass Flow Meters/Controllers for low pressure drop or corrosive gas service

## › Introduction

Bronkhorst High-Tech B.V., the European market leader in thermal Mass Flow Meters/Controllers and Electronic Pressure Controllers, has more than 40 years experience in designing and manufacturing precise and reliable measurement and control devices. With a wide range of instruments, Bronkhorst offers innovative solutions for many different applications in many different markets.

The instruments are made to customers' specification, in various styles, suitable for use in laboratory, industrial and hazardous areas, in such diverse applications as semiconductor and analytical installations, to name but two.

## › LOW- $\Delta$ P-FLOW series for low pressure drop or corrosive gases

In a number of applications for measuring and controlling gas flows there is only little differential pressure available and/or allowable. These are the applications for which Bronkhorst developed the LOW- $\Delta$ P-FLOW series, in which the flow resistance is minimised by using a large bore capillary (thermal bypass sensor) in combination with a cylindrical flow splitter (laminar flow element). Based on this concept, mass flow capacities between 0...10 ml./min and 0...1000 m<sup>3</sup>/h can be measured. At a flow up to 2 l/min a pressure drop of less than 1 mbar is required. Furthermore the larger flow channels minimise the risk of clogging and facilitate the cleaning and purging of these LOW- $\Delta$ P-FLOW instruments, which will contribute to a significantly longer lifetime when the instruments are used on corrosive gas service. All fluid wetted parts are of stainless steel with high surface quality. Optionally the flow meter body, sensor and flow element can be supplied in Hastelloy or Monel.

## › For laboratory or industrial conditions

The LOW- $\Delta$ P-FLOW series are derived from the laboratory style EL-FLOW series, however they can also be supplied with a rugged IP65 (dust and waterproof) IN-FLOW housing, suitable for industrial environments. The latter are also ATEX Category 3, approved for use in Zone 2 hazardous areas. In addition to the standard analog I/O-signals and the RS232 connection, there is the possibility of integrating an interface board with DeviceNet™, CANopen®, PROFIBUS®DP, Modbus RTU/ASCII, FLOW-BUS, EtherCAT®, PROFINET, Modbus-TCP, EtherNet/IP or POWERLINK protocol.

## › Mass flow control with low differential pressure

The control of mass flow with small pressure difference comprises the LOW- $\Delta$ P-FLOW Mass Flow Controllers in compact construction (model series F-200/201/202). The integrated proportional, electromagnetic control valves of these MFC's have extremely fast and smooth control characteristics. Depending on the operating properties, the maximum flow in these models is 1...50 l/min air-equivalent.

For the control of higher flow rates at very low differential pressures Bronkhorst High-Tech have devised special control valves with pressure compensation bellows (series F-004). These control valves are close-coupled to the flow meter while the electric PI-control function is an integral part of the flow meter. This F-004 valve has proven to be an excellent alternative to large, slow and expensive servo driven valves.

## › LOW- $\Delta$ P-FLOW features

- ◆ very low pressure drop
- ◆ suitable for corrosive gases
- ◆ larger flow channels to minimize risk of clogging and to facilitate cleaning and purging
- ◆ also available with IP65 housing, ATEX approval Cat.3, Zone 2
- ◆ alarm and counter functions
- ◆ Fieldbus interfaces:
  - ◆ DeviceNet™, CANopen®
  - ◆ PROFIBUS DP, Modbus RTU/ASCII, FLOW-BUS
  - ◆ EtherCAT®, PROFINET, Modbus-TCP, EtherNet/IP, POWERLINK

Models F-004BI and F-004AC bellows operated control valves

## › Technical specifications

### Measurement / control system

Accuracy (incl. linearity) (based on actual calibration)	$\pm 1\%$ FS (of Full Scale)	
Turndown	1 : 50 (2...100%)	
Repeatability	< 0,2% Rd (of Reading)	
Settling time (controller)	standard: 2...3 seconds	
Control stability	< $\pm 0,1\%$ FS (typical for 1 l./min N <sub>2</sub> )	
Operating temperature	-10...+70°C for ATEX Cat. 3 0... 50°C	
Max. operating pressure	10 bar	
Temperature sensitivity	0,1% FS/°C	
Pressure sensitivity	0,1% Rd/bar typical N <sub>2</sub>	
Leak integrity	tested < $2 \times 10^{-9}$ mbar l/s He	
Mounting position	horizontal	
Warm-up time	30 min. for optimum accuracy; 2 min for accuracy $\pm 2\%$ FS	

### Mechanical parts

Material (wetted parts)	stainless steel, other on request	
Process connections	compression type or face seal couplings; wafer type on series F-106; DIN or ANSI flanges on series F-107	
Seals	standard: Viton® options: EPDM, Kalrez® (FFKM)	
Ingress protection (housing)	IP40 or IP65	

### Electrical properties

Power supply	+15...24 Vdc		
Max. power consumption	Supply	at voltage I/O	at current I/O
	Meter	15 V	95 mA
Controller	24 V	65 mA	85 mA
	15 V	290 mA	320 mA
Extra for fieldbus (if applicable)	24 V	200 mA	215 mA
	15 V < 75 mA 24 V < 50 mA		
Analog output/command	0...5 (10) Vdc or 0 (4)...20 mA (sourcing output)		
Digital communication	standard: RS232 options: DeviceNet™, CANopen®, PROFIBUS®DP, Modbus RTU/ASCII, FLOW-BUS, EtherCAT®, PROFINET, Modbus-TCP, EtherNet/IP, POWERLINK		

### Electrical connection IP40 configuration

Analog, RS232	9-pin D-connector (male)
PROFIBUS®DP	bus: 9-pin D-connector (female) power: 9-pin D-connector (male)
DeviceNet™, CANopen®	5-pin M12-connector (male)
FLOW-BUS, Modbus-RTU/ASCII	RJ45 modular jack
Modbus-TCP, EtherNet/IP, POWERLINK	2 x RJ45 modular jack (in/out)
EtherCAT®, PROFINET	2 x RJ45 modular jack (in/out)

### Electrical connection IP65 configuration

Analog, RS232	8 DIN (male);
PROFIBUS®DP	bus: 5-pin M12 (female); power: 8 DIN (male)
Modbus-TCP, EtherNet/IP, POWERLINK, EtherCAT®, PROFINET	bus: 2 x 5-pin M12 (female) (in/out); power: 8 DIN (male)
DeviceNet™, CANopen®	5-pin M12 (male)
Modbus-RTU/ASCII, FLOW-BUS	5-pin M12 (male)

Technical specifications subject to change without notice.

## › Models and flow ranges (based on Air)

### Mass Flow Meters (MFM)

Model	min. flow	max. flow
F-100D/F-100DI	0,2...10 ml <sub>n</sub> /min	0,44...22 ml <sub>n</sub> /min
F-101D/F-101DI	0,42...21 ml <sub>n</sub> /min	0,042...2,1 l <sub>n</sub> /min
F-101E/F-101EI	0,028...1,4 l <sub>n</sub> /min	0,24...12 l <sub>n</sub> /min
F-102D/F-102DI	0,28...14 l <sub>n</sub> /min	0,5...25 l <sub>n</sub> /min
F-102E/F-102EI	0,17...8,5 l <sub>n</sub> /min	1...50 l <sub>n</sub> /min
F-103E/F-103EI	0,9...45 l <sub>n</sub> /min	4...200 l <sub>n</sub> /min
F-106xD/F-106xD	0,2...10 m <sup>3</sup> <sub>n</sub> /h	20...1000 m <sup>3</sup> <sub>n</sub> /h

### Mass Flow Controllers (MFC)

Model	min. flow	max. flow
F-200DV/F-200DI <sup>1)</sup>	0,2...10 ml <sub>n</sub> /min	0,44...22 ml <sub>n</sub> /min
F-201DV/F-201DI <sup>1)</sup>	0,42...21 ml <sub>n</sub> /min	0,042...2,1 l <sub>n</sub> /min
F-201EV/F-201EI <sup>1)</sup>	0,028...1,4 l <sub>n</sub> /min	0,24...12 l <sub>n</sub> /min
F-202D/F-202DI	0,28...14 l <sub>n</sub> /min	0,5...25 l <sub>n</sub> /min
F-202EV/F-202EI <sup>1)</sup>	0,17...8,5 l <sub>n</sub> /min	1...50 l <sub>n</sub> /min

<sup>1)</sup> Kv-max =  $6,6 \times 10^{-2}$

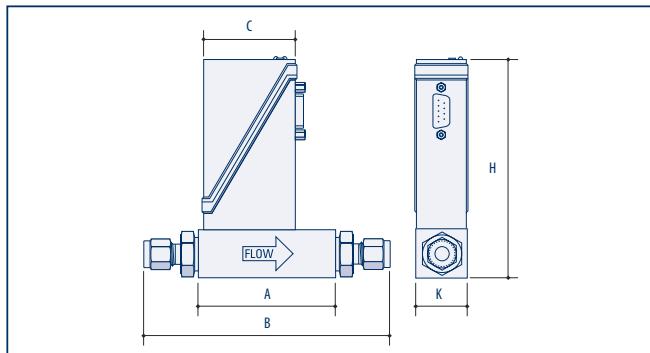

### Control Valve series F-004

	F-004AC/F-004AI	F-004BI
Kv-value	0,3	1,0
Max. operating pressure	10 bara	10 bara
Min. ΔP (approx.)	1 mbard	1 mbard
Max. ΔP	5 bard	5 bard
Max. power (at 15 Vdc)	3,5 Watt	3,5 Watt
Protection class	F-004AC: IP40 F-004AI: IP65	IP65

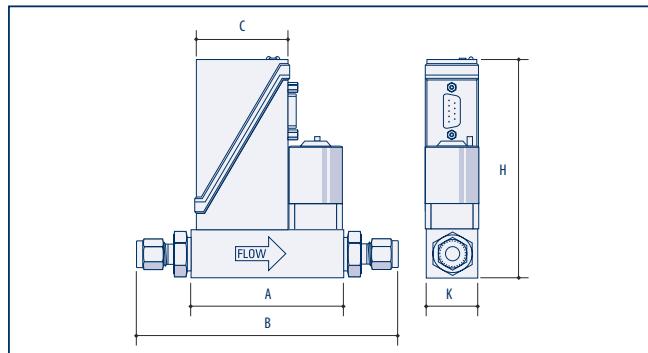

LOW-ΔP-FLOW F-202EI Mass Flow Controller, IP65 configuration

## ► Dimensions (in mm) and weights (in kg)

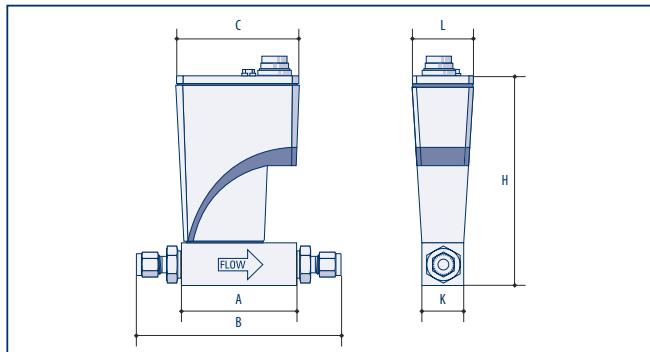

**IP40 Mass Flow Meter**

Model	A	B	C	H	K	Weight (kg)
F-100D (1/8" OD)	47	98	47	111	25	0,4
F-101D/F-101E (1/4" OD)	69	126	47	111	25	0,5
F-102D/F-102E (1/2" OD)	69	134	47	123	26	0,6
F-103E (1/2" OD)	110	77	47	168	89	4,0

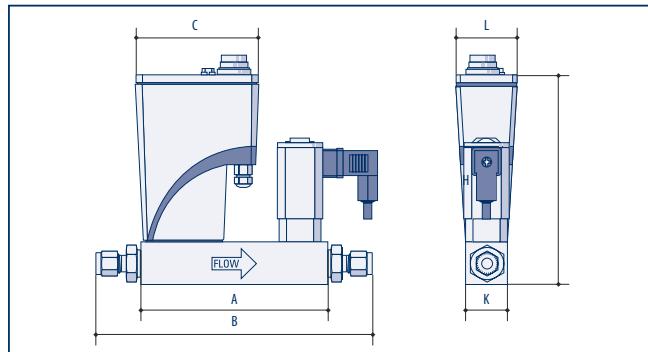

**IP40 Mass Flow Controller**

Model	A	B	C	H	K	Weight (kg)
F-200DV (1/8" OD)	77	128	47	111	25	0,6
F-201DV/F-201EV (1/4" OD)	77	134	47	111	25	0,6
F-202DV/F-202EV (1/2" OD)	78	143	47	123	26	0,8

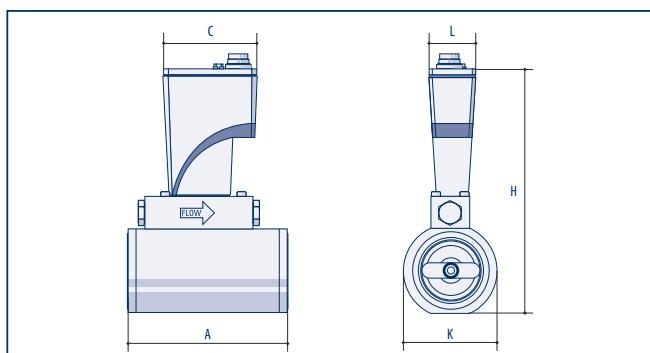

**IP65 Mass Flow Meter, low/medium flow**

Model	A	B	C	H	K	Weight (kg)
F-100DI (1/8" OD)	47	98	74	125	25	0,8
F-101DI/F-101EI (1/4" OD)	69	126	74	125	25	0,9
F-102DI/F-102EI (1/2" OD)	69	134	74	137	26	1,0
F-103EI (1/2" OD)	110	177	74	182	89	4,4

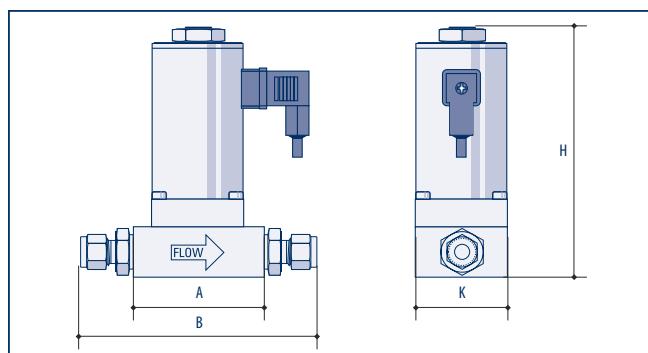

**IP65 Mass Flow Controller**

Model	A	B	C	H	K	L	Weight (kg)
F-200DI (1/8" OD)	112	164	74	125	25	36	1,3
F-201DI/F-201EI (1/4" OD)	112	169	74	125	25	36	1,3
F-202DI/F-202EI (1/2" OD)	112	169	74	139	59	36	1,5

**IP65 Mass Flow Meter, high flow, wafer type**

Model	A	B	C	H	K	Weight (kg)
F-106AD	125	74	192	75	36	4,0
F-106BD	125	74	205	85	36	4,6
F-106CD	125	74	234	115	36	6,8
F-106DD	125	74	264	145	36	9,5
F-106ED	125	74	319	198	36	13,3

**F-004 series Control Valves**

Model	A	B	H	K	Weight (kg)
F-004AC/AI (1/4" OD)	64	121	122	45	1,2
F-004BI (1/2" OD)	85	152	174	65	3,4

Dimensions subject to change without notice. For certified drawings and for dimensions of F-107Z series flanged type mass flow meters please contact factory.

## Conversion factor calculations for model selection

To select the right model for other gases than Air, we have to carry out two calculations:

$$1. \quad \varnothing_{vn} \text{ Air} = \frac{\varnothing_{vn} \text{ gas}}{\text{conversion factor}}$$

$$2. \quad \varnothing_{vn} \text{ Air} = \frac{\varnothing_{vn} \text{ gas}}{\text{viscosity factor}}$$

The highest flow rate calculated determines the flow capacity.

Example: Freon-22, 1 l<sub>n</sub>/min

Conversion factor = 0,49 (see table below)

Viscosity factor = 0,34 (see table below)

$$1. \quad \varnothing_{vn} \text{ Air} = 1/0,49 = 2,04 \text{ l}_n/\text{min}$$

$$2. \quad \varnothing_{vn} \text{ Air} = 1/0,34 = 2,94 \text{ l}_n/\text{min}$$

Highest flow rate = 2,94 l<sub>n</sub>/min so we can select model F-101E or F-101EI MFM resp. F-201EV or F-201EI MFC.

## Conversion factors and viscosity factors

Name	A	B	C	Name	A	B	C	Name	A	B	C

## › Fields of application

The LOW- $\Delta P$ -FLOW series have been successfully applied in a wide variety of both OEM and laboratory applications, e.g.:

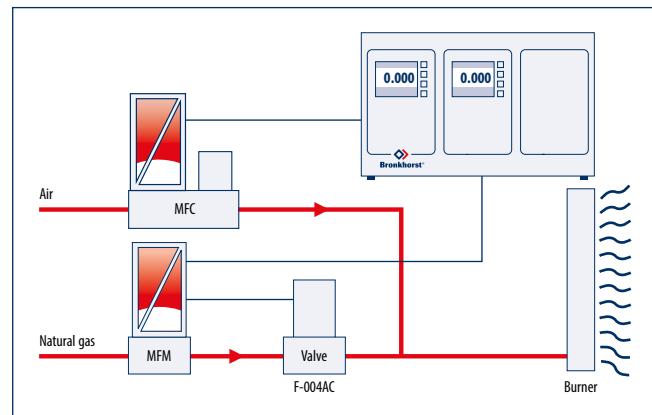

- ◆ Environmental air sampling at atmospheric conditions
- ◆ Leak rate and permeability measurements
- ◆ Burner control
- ◆ Measurement of gas consumption, for example of natural gas, in low pressure gas distribution systems

## › Air sampling

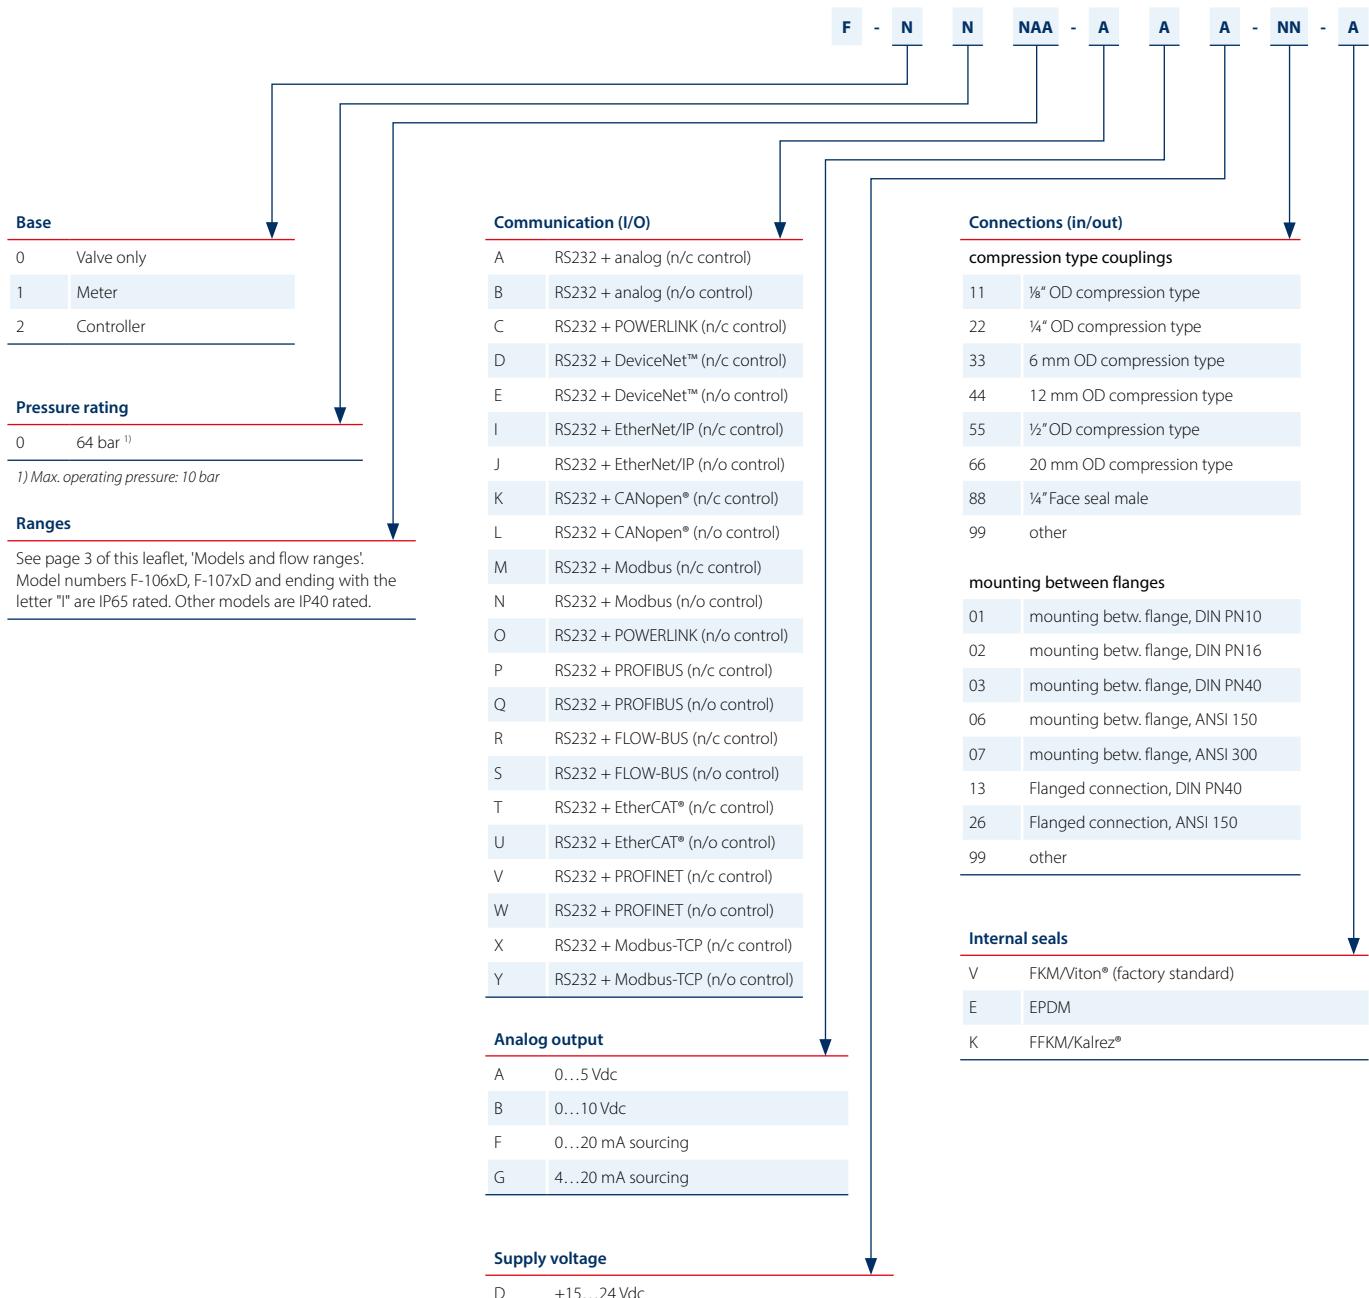

An interesting example to control a flow rate is using a LOW- $\Delta P$ -FLOW Mass Flow Meter in combination with a sampling pump. In this configuration the speed of the pump is controlled to obtain the required mass flow rate, determined by the setpoint value.

## › Burner control

Burner control using Mass Flow Controllers brings many advantages compared to conventional systems, where flow is adjusted through needle valves. When burner orifices get clogged or when gas supply pressure varies, an MFC will automatically adapt to the changed conditions. For the control of relatively large flows with low differential pressure, which is typical for natural gas or CH<sub>4</sub>, LOW- $\Delta P$ -FLOW Mass Flow Meters in combination with F-004 pressure compensated bellow valves have proven to be a successful solution.

## Model number identification

F-101DI Mass Flow Meter, IP65 configuration

F-102E Mass Flow Meter, IP40 configuration

[www.bronkhorst.com](http://www.bronkhorst.com)

Bronkhorst High-Tech designs and manufactures innovative instruments and subsystems for low-flow measurement and control for use in laboratories, machinery and industry. Driven by a strong sense of sustainability and with many years of experience, we offer an extensive range of (mass) flow meters and controllers for gases and liquids, based on thermal, Coriolis and ultrasonic measuring principles. Our global sales and service network provides local support in more than 40 countries. Discover Bronkhorst®!
