

# M4 - 1/2" PULSE METERS

The M4 is the new addition and is a low to medium flow range model replacing the current M5 series. It has the ability to handle a wide range of fluid viscosities with exceptional levels of repeatability and durability. Along with compact size.

## Product Benefits

- Compact size.
- Two independent pulse units which can be linked to allow doubling of the pulse output (or in-built spare if used as single).
- Will handle particle sizes to 0.28mm/0.011".
- Flexibility of installation options (e.g. can be mounted horizontally or vertically; no flow conditioning required).
- Low pressure drop allows for economical pump selection or gravity flow applications.
- Meter construction enables fast and easy on-site servicing without removal from application.
- Meter design minimises the number of wearable and replaceable parts and extends product life.
- Meter accuracy is verified by factory calibration check after which an individual metrology report is issued.
- Has IP66/NEMA6 protection.

**Port Size** To order flowmeter you must replace 'X' with the relevant number. This number will determine the following specifications:

**Port Size:**

- 1 = 1/2" BSP (F) ports
- 2 = 1/2" NPT (F) ports

**Electrical Conduit Connection:**

- 16mm (F)
- 1/2" NPT (F)

**Calibrated In:**

- Litres
- US Gallons

PPS = Polyphenylene Sulfide Resins
