

CONSTRUCTION AND DESIGN OF INSTRUMENTS FOR FLOW, LEVEL AND TEMPERATURE

Principle

EMCO classical venturi tubes are used as primary elements in flow measurement of steam, liquid and gas according to the differential pressure principle.

Construction

Design standards : ISO 5167-4, ASME MFC-3M

Sizes : DN 200 - 1200 according to ISO 5167

Bore/diameter (β) : $0.4 \le \beta \le 0.7$ (ISO 5167), $0.3 \le \beta \le 0.75$ (ASME)

Pressure rating : PN 10 - 100, 150 - 600 lbs, ISO PN 20 - 100

Material : Carbon steel, AISI 316, others on request

Mounting style : Weld ends according to DIN 2559 or ANSI B16.25.

Flanges acc. to DIN or ANSI B16.5 standards or

Clamp connections, like Grayloc

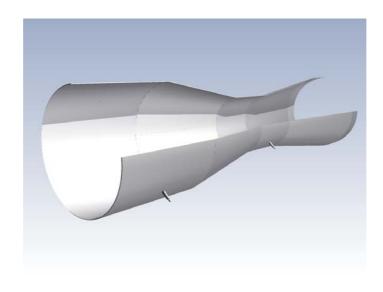

Pressure taps : Weld ends Ø 21.3 mm, 26.9 mm, thread connection

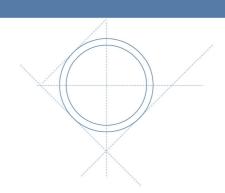

3/8", 1/2" BSP male, 1/2" NPT

Tappings : Single pressure tappings or 2x4 tappings each arranged with an

external annular ring to equalise the pressure

Outlet cone : 7 - 15°

Technical Data

: 1,5 % (according to ISO 5167-4) Accuracy

Pressure loss : Depending on outlet cone between 10 - 15 %

of the differential pressure measured

 $2 \times 10^{5} < \text{ReD} < 2 \times 10^{6}$ according to ASME Limits for Re. No.

: Shut-off valves and condensing chambers for steam flow measurement Accessories
